

LD on (linear, c=0.5), D14-inclusive V2 A/B full-warm, target $\varepsilon_{rel} = 10^{-3}$

Both old and candidate V2 full-warm timings include D14/topology; candidate value-converged 3608/3608 (100.0%)

Grey cells: fewer than 8 rows. Error uses candidate value against the existing VBM RelTol=1e-6 reference; hatching marks incomplete value coverage.
